MY STORY

I'm an aspiring Full Stack Developer, with over 14 years in the graphics industry.

I have always been obsessed with technology and I love to create things. I have redirected this creative energy from modifying PC's and vintage consoles into the software space.

After trialling some online courses and now studying at GA, I have found that programming gives me a way to be creative and build cool stuff.

Currently playing with: Node.js, Blender , SCSS, React, CRX, SQL, RoR.

Played a lot with: Illustrator, HTML, CSS, JS, Photoshop, GSuite.

RELEVANT EXPERIENCE

General Assembly AUS (2019) - Software Engineering Student
• Completed 3 Month immersive Bootcamp averaging 65 hours per week
